

Foundation Training Job Description

Grade	Foundation Year 2
Placement	Acute and Metabolic Medicine 14/YHD/RCD00/01/F2/004
Department	<p>Directorate information: The Department provides excellent training opportunities in general medicine as well as diabetes and endocrinology.</p> <p>The department looks after patients with acute diabetes related problems; major electrolyte imbalances including hypercalcemia and hyponatremia and a myriad of acute medical problems.</p> <p>Emergency medical cases are admitted each day via the admissions unit. During the day the acute take has constant consultant supervision via the CATT team.</p> <p>All major medical specialties have consultant cover; facilities include a stroke unit, CCU, HDU and ITU beds; CT, MRI, coronary angiography, permanent pacemaker fitting and endoscopy/bronchoscopy services are provided on site. Clinical support workers help on-call teams with venesection, ECG's ,phlebotomy etc.</p> <p>Critical care outreach service support is available through the week for acutely unwell patients and ITU step down patients.</p> <p>Specialist nurse teams include those for cardiology, diabetes, respiratory medicine and palliative care. In addition there are elective admissions in most specialties, and we have a day care unit that provides planned care and arranged for dynamic endocrine tests.</p> <p>Staffing in the Diabetes &Endocrine Directorate: The medical team consists of:</p>

4 Consultants
 2 Specialist Trainees
 1 CMT , 1 FY2 and 1 FY1
 4 Diabetes Specialist Nurses,
 Inpatient diabetes specialist nurses will support you on the wards.
 Visiting consultants from York and Leeds provide cover for renal medicine, vascular surgery, out-patient dialysis and oncology amongst others.

The Department of Chemical Pathology

The department is led by a Consultant Clinical Scientist and has several Biomedical Scientists. A wide repertoire of tests is provided by the laboratory which is CPA accredited. Specialised tests are sent away to other CPA-Accredited laboratories. Consultant support is available for interpretation of test results and clinical advice. The laboratory has a special interest in testing outside the laboratory and in the methodology of decision support. The consultant clinical scientist is also an active member of the Diabetes and Endocrinology team and the department is involved in the clinical meetings of this unit. The department is housed in new and spacious laboratory accommodation in the Fewston Wing of Harrogate District Hospital.

The Department of Diabetes and Endocrinology

The department is led by 4 Consultant Physicians supported by diabetes nurse specialists. Each week there is a general diabetes clinic, endocrine clinic, insulin pump clinic, diabetic foot clinic, diabetic/endocrine pregnancy clinic and twice monthly young adult clinics. There are 2 MDTs a week, at which patients with metabolic problems and results of complex endocrine patients and results of dynamic endocrine investigations are discussed.

Intensive Care

The metabolic/endocrine team provide advice ITU on metabolic problems. There is the opportunity for the trainee to attend the morning ITU ward round when other commitments allow.

The type of work to expect and learning opportunities

This post is an opportunity to become involved in both metabolic and acute medicine. Learn about pathophysiological process and the interpretation of clinical pathological data. You will also have direct clinical exposure to patients with metabolic and endocrinological conditions. It provides an opportunity to work with multi-disciplinary teams within chemical pathology, diabetes and endocrinology, and intensive care. The post holder will also be expected to complete a clinical audit project within the four month attachment.
